Melody's First Time

- 1. Part 1
- 2. Part 2

Part 1

He'd always fantasized about her.

Richard rung her doorbell nervously, trying to hide his anticipatory boner with his anatomy textbook. He'd never done anything like this before, but if his little gambit paid off he'd be the first of his nerdy little friend group to lose his virginity.

Melody opened the door, looking confused. "Richard? What are you doing here so early? I thought the study group wasn't coming over for another hour."

He smiled, trying to look nonchalant while his cock throbbed in his pants. She wasn't quite dressed, and as per usual, she seemed oblivious to how much of herself she was showing off. Her white tank top plunged low, showing off a view of two creamy breasts and nipples that almost peaked out the top, but instead just poked bralessly through the sheer fabric. Richard knew that view would fill his mind (and his tissues, and socks, and shower drain) for the next week even if the plan didn't work.

He started on his story, trying his best to sound genuine. "I know you were out sick this week, so I figured I'd come early and catch you up on the material."

She frowned, and from her gaze he felt like she was staring right through his textbook to his turgid member. Then she smiled up sunnily. "Well, isn't that nice of you! I'm sure you can catch me up fast, come on in." She turned around, and he took the opportunity to quickly tuck his cock up into his waistband. Her shorts were riding up, leaving each cheek of her bubble butt perfectly outlined. He flinched as a tiny drop of precum leaked onto his T-shirt.

"So, what did Ms. Horace put us to sleep with this week?"

"Human Genitalia and Sexuality. And, I know this is sort of awkward, but she said we each have to do a thorough manual inspection of the other gender's...bits, and write a detailed report on them." He held his breath, not daring to try to explain what extra credit would entail.

She wasn't buying it. He could see it immediately on her face; face downcast, cheeks flushed red with anger or humiliation, almost trembling a little bit. He needed to start damage control. He'd play it off as a joke: "*Haha, nahh we just learned about the*

mitochondria this week. No, of course I wasn't trying to get in your pants! Just lemme go to the bathroom and rub one or two out while imagining you between my legs, checking my cock for 'educational purposes' and seeing what-"

"Interesting. I thought that old windbag just wanted us learning from the book, but that sounds a lot more practical. Can I see yours first?"

She was blushing, and looking straight between his legs. For the first time in his life, Richard knew the feel of a girl wanting his cock, and the tiny patch of precum grew..

"Uh, yeah, of course." He fumbled at the belt, and she boldly stepped forward to help him. He couldn't believe this was happening. She was so close he could smell her perfume. She finally unbuckled his belt, and they slid his jeans off together.

Finally, she hooked her thumbs around his briefs and pulled them down, and he shivered in anticipation as she looked down admiringly at what she had uncovered. Aside from family and doctors, nobody besides him had ever seen his penis, and he had just revealed it to his biggest crush. He looked down at her as she looked up into his eyes, her mouth wide in admiration and her eyes sparkling.

There was no mistaking that look on her face. She *loved* his cock. Like most boys, he'd always worried he was too small. But the look on Melody's face was not that of a disappointed woman.

"So...Tell me about it."

Richard gulped. He glanced at the open biology book on the sofa behind him, totally forgotten in favor of more practical lessons. He read aloud nervously

"Well, if you put your hand on this dark ridge right here, that's my...corona, and it's really sensitive, although it's better if you use lubrication-"

She rolled her eyes. "Not your boner! I know all about that part from my exes. What I want to learn about..." She put her hands on his shoulders, looking up at him sweet and innocent, big brown eyes twinkling with admiration for his rock hard (and dripping) cock. He couldn't wait to teach her about-

"...are *these*."

Her knee rocketed up between his legs, pinning his balls into him. Richard's vision went white.

She'd always fantasized about them.

Ever since she'd seen her first pair. When other girls were passing around sticky Playgirl magazines and ogling the fat pink pricks on the centerfolds, her gaze was always focused a little lower. Those wrinkly, dangling orbs that contained their real manhood were her biggest source of curiosity and desire. But those were taboo; her friends called her gross for fantasizing about what looked like turkey gizzards to them, and even her boyfriends wouldn't let her get near them because they were "too sensitive".

And unlike her friends, she wasn't just interested in pleasing a guy. For whatever reason, the idea of abusing a guys' balls was the hottest thing in the world to her. She soon learned she was unique in this regard; the world of 1986 didn't have any way to connect to perverts across the globe. She didn't hate men; she just loved the idea of hurting their balls and had never gotten unrestricted access to a pair of her own. Now, finally, she did. Before the boy attached to them had a chance to react, she shot her knee up into his orbs again, this time keeping it there and savoring the bizarre way they squished and rolled around beneath her kneecap.

"Please...Melody...Why?," Richard sputtered out. He matched all those movie scenes perfectly; knees turned inwards, voice shaky and high-pitched, eyes starting to tear up as he frantically tried to push himself back from her knee. She pushed her knee just a little farther into his crotch, rolling his nuts around one final time before putting her foot down and letting him fall to the floor clutching his crotch.

She giggled innocently. "It's like you said. I need to learn about male genitalia!"

His voice wavered in pain as he said, "I...I can let you play with them, maybe see what my orgasm looks like. But why do you have to hurt me?"

She rolled her eyes at his 'generous' offer of an orgasm display, then prodded his fingers laced around his package with her toe, ineffectively trying to pry his hands free.

"I know what cum is, I know how to give a blowjob, I know all that fun stuff. But I've never really got to learn about - C'mon dude, stop blocking the view." He made no effort to move his hands.

whump.

She pulled her foot back and punted him in the groin, his hands taking most of the force and muffling the satisfying impact she wanted. She didn't want to keep kicking him like this; she was worried she'd liquify his testicles before she got to feel their solid insides

with her hands.

Plus, she recalled the warnings teachers had given them in sex ed, about how easy a well-delivered kick or a knee could leave a boy sexless and childless for life. That lecture had made her almost soak her panties in class, of course, but she could keep fantasy and reality separate. Couldn't she?

Luckily, they hadn't warned against squeezing or groping them, so her plan should work fine without rendering him seedless. And surely another kick would get him to release them for her.

whump

Her toe crushed his hands into his package, and she felt his grip weaken. "Please Richard, I know it's probably a little uncomfortable, but I swear I'll make it up to you afterwards." She smiled down at him sympathetically. "After all, you said you needed to learn about my bits as well, right?" She planted her feet wide apart, and he saw his cock twitch as he looked up at her damp white panties.

The carrot worked better than the stick, and he finally eased his hands off of his balls. She got on her knees and scooped up the pair in her hands, bringing her face in close for inspection. His cock twitched again and sprung fully to life, almost hitting her in the eye. She dodged it and giggled, squeezing her fingers into his balls.

"Well, I'm happy to see you too!"

He tried to appreciate the view he had envisioned so many times: Melody practically naked between his legs, almost drooling over his swinging package...but his fantasies didn't include the nausea that was creeping up from his nutcords as the object of his desire seemed to be doing her best to leave permanent damage on him.

"Don't worry, I'm not actually going to pop them. They warned us all about that in sex ed." She explained cheerfully as she rolled them around curiously in her hands. Richard shuddered at his own experience with the same subject; graphic display after graphic display of shattered and splattered testicles on the overhead projector, their health teacher smiling benignly as she explained all the symptoms that came with each unique injury, and how easy said injuries were to induce. Usually by women.

"I just want to see what's inside of them. Well, not really 'see' since everything will stay in your sack, but you know...play with it a bit. See what their structure is like. So, here's the deal: I'm going to crack them just a *smidge*, and squeeze a little bit of your ball out

through the hole I make." She sounded proud of herself, like she'd just negotiated a great compromise. "I get the education I need, and you get to keep your coins in your coin purse, so to speak."

She grinned impishly, and her blush returned. "Although I might shortchange you a bit."

Squeeze

His balls bulged out between her fingers, and the wrinkly sack containing them stretched taut. His face had gone from agony to what she thought must be either quiet acceptance. The poor boy must have been scared of castration at first, after all! She couldn't blame him either; if all of her ability to give and receive pleasure was tied to the intactness of two fragile, bizarre little orbs between her legs, she'd be paranoid about anyone hurting them too. And although she fantasized about feeling two balls popping in her grip, she knew better than to end this boy's sex life just for her own enjoyment.

Still...Surely she could crack them a bit without making things unfixable?

She pressed her thumbs into the top of his nuts. Tiny bubbles of nutflesh bulged out of his balls with a soft *crunch*, and she smiled approvingly. Richard's whining had given way to a constant high-pitched keen. As she worked her thumbs deeper into his organs, disconnecting the tiny tubules, his keening became a series of delicious squeaks elicited by each tiny movement of her thumbnail. By her estimation, each bubble was only a tiny fraction of the volume of their respective organ, so he probably wouldn't be losing more than one twentieth of his hormonal and reproductive capabilities.

Squick. Well, maybe one tenth.

Finally, each ball had a tiny concavity at the top, like a newly opened soft-boiled egg. Melody took her thumbs out of the dimples she created, and moved her hands down to the main meat of the nuts. Each nut had started to leak something warm and wet into his sack, and Richard was terrified of what that might mean for his ability to father children. He had gotten his voice back, and was whimpering softly.

"Please...Melody, please don't, I'll never try that again, I'm so sorry for pissing you off--"

She ignored his blather. Truth is, she had no idea what he was apologizing for, but she had never been less pissed off; she was way too horny for that. She was flushed red and trembling just a bit, as aroused as his bobbing, dripping cock had been the whole time.

"Quiet, Richard, I'm almost...almost done here."

She gripped each nut like a tube of toothpaste, and squeezed. She was just trying to get a little lump out of each nut, not their entire insides. But she had no idea of how much pressure to use, or how much damage her work had already done.

Her fingers sank right through each half his manhood like they were pudding, and instead of a pea-sized lump of innards, each orb expelled its entire contents out through the breach in their shells. She knew she should let go at this point, and tried to stop herself, but it's difficult for a girl to control herself in the throes of an orgasm. Her mind went blank, and she made no effort to reduce the stress she put on his organs as the solid things became liquid in her grasp.

She looked up at her male friend with her mouth agape, barely comprehending what she had just done. He looked back at her with eyes full of betrayal, his mouth gibbering wordlessly as he came to grips with her handiwork.

And that's when his first spurt of cum hit the bottom of his chin. Melody didn't know much about balls, but she figured that wasn't a good sign and she had to act fast. Cum came from his balls, so surely an orgasm was going to force him to spew his liquified balls all over himself. But maybe, if she could keep them inside of him, the doctors could piece together the liquidy mush into something resembling a pair of nuts. Moving viper quick before his next spurt could go off, Melody pressed her left thumb deeply into the underside of where his cock joined his body, restricting the flow of semen to a pinprick. She placed the other on its tip, shoving her finger into his slit and plugging it like a cork for a second layer of protection.

Of course, medical technology hadn't come anywhere near close to reconstructing a liquified ball, and as his doctors would explain to her later, all Melody had accomplished with her efforts was a very complete squelching of his last orgasm. Each powerful buck of his hips resulted in a sharp stabbing pain at her two pressure points as she blocked spurt after spurt of cum from escaping, her thumbs clamping his urethra shut like a hydraulic press around a firehose. Melody's naivete prevented his body from pushing its genetic material out into the world one last time.

Deprived of even a final relief, her newly-made eunuch finally passed out from the pain.

"Don't worry Richard, you'll be ok! I kept most of your balls inside of you for the doctors to heal up." She took her hand off him, and scrunched her nose in disgust as a stream of thick white goo escaped from his battered cock. "Um...Unless you're going to cum all of it out onto yourself. That...that doesn't seem like the best idea to me, but I guess I can't

stop you." His prick twitched, and he coated his belly with another gelatinous spurt. She sighed; there really wasn't anything she could do to stop this boy from ending his own sex life.

Well, she'd done her best. She couldn't help but feel a little guilty for his castration; ultimately it was his fault, but she should have been a little more gentle on his fragile organs instead of getting caught up in her own desires. Still, she was still going to tuck this memory away forever, and she knew it would be her last thoughts on so many cold, lonely nights. His permanently limp dick was like a tiny pink worm now, and his sack was almost completely devoid of the contents she had tried so hard to keep inside. She had just finished wiping him down and was about to call the hospital when the doorbell rang.

Her other two study buddies had arrived.

Part 2

"What's taking her so long? Did she forget how to unlock the door or something?"

Nathan looked at his watch impatiently while Tommy rang the doorbell again. Nathan found their female partner's naivete to be insipid and grating, but Tommy had always had a bit of a crush on the sweet (if slightly ditzzy) girl. Both agreed that her chronic inability to clothe herself appropriately made her a worthy member of their quartet of bio nerds.

They could hear scuffling noises behind the door, so their host was certainly home. Finally, the buxom blonde opened the door. Her hair was a mess, her face was flushed, and a sheen of sweat covered her forehead. She was panting heavily.

The two boys gave each other a look, mouths agape as they did a double take at the sight of the obviously flustered girl. They didn't need experience with women to know what had happened.

Melody Smith had just been masturbating.

They immediately dropped their eyes, each choosing to fantasize about that scene without looking at their friend, and each trying slyly to perform the same awkward swipe-and-tuck that Richard had done one hour earlier.

"So uh, you two can just-" She flapped vaguely at the couch. "Sit down there and we can start on the project from this week."

The two were confused. Tommy piped up, "Uh...which project, Melody?"

Now she gave him a confused look. "You know, the study of um..." She gestured vaguely towards their crotches. "...your bits? Richard came over early to explain it to me."

"Richard is here?"

Her eyes darted from his. "No! I mean, yeah. No, not anymore though. He...*was* here. I already finished with him, and he went home," she blurted out quickly. "But I figure I'd get a higher score if I examined both of yours as well!"

Tommy almost said something, but Nathan elbowed him to keep him quiet.

"Anyway, I have to go upstairs to uh...just finish something up really quick. Just get ready for me before I get back, ok? I figure I can examine both of you at once, and really compare and contrast your different qualities to get an idea of how they can differ in

shape, size and function." She beamed innocently. "I can't wait to learn about each of your cock and balls! Richard's were...are so interesting!"

The two boys followed her ass up the stairs with their eyes, making no effort to hide their efforts from each other. Once she was out of sight, they looked at each other and tried to figure out what to make of this.

"So, Nathan, uh--"

"Richard definitely tricked your crush into fucking him with a fake bio project, right?"

Tommy gasped. "What? Why would you even say that! I think she just..." He trailed off, unable to think of a less ridiculous explanation.

Tommy swallowed his anger and confronted the truth. "Yeah. He did."

"And...are you okay with that?"

He looked at Nathan, both of them trying to avoid looking at the other's tenting pants.

"No, of course not, but...Look, it's...it's a dick move (*'Literally'*, Nathan cracked). But if his little scheme ends up getting Melody to 'examine' me, I think I can find it in my heart to forgive him."

Nathan grinned. "Well, I don't really have a horse in this race, but I'm sure as hell not going to turn down a go with her if she's just 'handing' them out. Just...No looking at each other's cocks, right?"

Tommy nodded, and both boys pulled their pants down, nervously awaiting their supposed masturbatrix.

Melody finished securing Richard to her bed and closed the door behind her. She didn't think he would wake up while she finished up the assignment with the other two, but just in case she didn't want him escaping and messing up her chances with her new balls.

She came back down the stairs, delighted to see both boys had followed her directions. Two cocks, one circumcised (Tommy's) and one not (Nathan's) bobbed stiffly between their legs. Nathan's package was disappointing, to say the least. His cock wasn't too short, but it was skinny as a pencil, and the foreskin made his whole head look like a

mess. His sack hung several inches slack below him, but his ballcords only seemed to give his small nuts half that length, so they hung weirdly halfway down, not quite reaching the couch below him.

But Tommy's package...God, it was *beautiful*. She'd always thought he was a bit of a cutie (in that disarmed nerd kind of way), but his balls made him into her biggest crush. As big as tangerines and pendulous, the two well-proportioned testicles puddled out on the pleather couch seat, not too saggy but with just enough slack for her to roll around and play with. They were just the right volume to fill one of her hands, unlike the shriveled olives in her other partner's lap.

She got on her knees right between them, taking each ballsack in her hand and rolling their contents around gently. Both of Nathan's gonads fit easily in the palm of her hand, but she can only get her hand around one of Tommy's perfect testicles at a time. She pulls each pair down a little sharply, eliciting this insanely hot gasp from the cute curly haired owner of large pair in her right hand, and an annoyed grunt from the ratty asshole in her left.

"Hey, I'm not going to cum if you just play with my nuts all day, and that kind of fucking hurts. Remember, reproductive capabilities or...whatever the requirements were? So just hop to it and start jerking already."

Nathan's nasally voice grated on her ears. That seemed like as good a cue as any to start.

She took his advice. She jerked both her hands suddenly downwards, squeezing tightly on their tenderest bits.

Tommy's screams were deep and manly, the sounds of a huge beast felled by a wild hunt. Nathan's were weak and gasping, even a little high-pitched, like he had already lost his nuts. It was fascinating to her to see all the ways that a lack of manhood could change the way a boy was.

"Please, Melody, we're sorry about what Richard-GOD!" Melody gave a kiss to Tommy's tender cockhead, and the resulting arousal made his fat balls jump up in his sac, pulling them the opposite direction of her hand and stretching their cords more. She dug her thumb into the connective spot between that ropy fleshy cord and his nut, and pulled harder. She half-expected the little tubes to come out by their roots, but they were much stronger than she had suspected. She was glad to see she wasn't in danger of neutering her prize stud.

Nathan was not so apologetic. "Christ, Melody, let go of my fucking *nuts*! You're pulling them way too hard, *fuck*. I think...I think I need to go to the hospital."

Melody rolled her eyes at his overreaction. Sure, his nutcords were more like dental floss than rope, so they might be more fragile than his study buddy's. And sure, his balls didn't hang down as far, so his cords were probably a little shorter. Still, they definitely had a little more give before they-

Snap. SNAP.

For the second time that day, Melody had overestimated the structural integrity of the male package. Nathan's tiny olives broke free of their bonds and dropped to the bottom of his ridiculous sack with a soft *s/ap*. She lost her balance and tumbled away from both boys' laps, releasing Nathan's sack and accidentally putting all her weight on the only intact set of nutcords in the room. Miraculously, they held out, but Tommy's yowling told her she was starting to cause some serious injury.

She let up her pressure on Tommy so she could pay attention to the boy who had just had his balls disconnected from him. Just to make sure they were really snapped off, she gave him a sharp left jab between the legs. He shuddered when her fist connected with the remaining bit of his shredded nutcord, but his balls didn't seem to have any feeling at all.

Damn. Another accidental neutering. She needed to learn her own strength.

Nathan started bucking hard too, just like Richard had done as he lost his manhood, and at first she thought she would have to clean up another mess before she could move on to the last pair of balls. But the damage she had done this time left the boy unable to produce a final load. He twitched and gasped as his raw nutcords drew up into him over and over again, desperately trying to pump out spunk that no longer existed. The poor nutless wonder only managed to drool a thin stream of clear seminal fluid out of his last erection.

Tommy watched his friend's fate in horror. He knew that loud *snap* could not have been good for Nathan's nuts. He tried to scramble away, but Melody now had two hands to keep occupied between his legs. The doubled pressure stopped his escape.

His crush began when his balls first dropped, and she now seemed intent on continuing that process. If he didn't get free, he would surely suffer the same fate as Nathan, and something was very wrong with his friend's nuts now. He tried to keep his voice calm as he addressed the inadvertent but highly competent castratrix between his legs.

"Melody...I think we need to get a doctor **mmff** for Nathan. I...think you might have pulled his balls out."

"Yeah, I did. I'm sorry, I know you guys were close friends. Do you think he'll be alright?"

Tommy didn't answer. It seemed surreal; his friend's life had just changed forever. They'd talked about their kids playing together when they grew up, and now it seemed unlikely that either of them would be fathering children.

But her next sentence put his nutless friend far out of his mind.

"I've always had a bit of a crush on you, Tommy." His heart stopped, even though the pain didn't. She was rolling his balls around roughly in her palms, compressing and squishing the organs that he was well aware were comically fragile.

"I don't want to pop both of them, like I did to Richard!"

"You...you popped Richard's balls?!", He gasped in disbelief. Of course, seeing what she had done to Nathan, he shouldn't have been so shocked.

"It was an accident, I swear! I...it's not like I *enjoy* neutering guys or anything," she stammered defensively..

Tommy sighed. "And...and was pulling Nathan's out like a couple of weeds an accident too?"

"Yeah, exactly!" Her frown turned to a grin. "But...I'm still worried about the report. For Ms. Horace."

She was still on that idiotic lie Richard had told her. She just wanted her grade. Tommy opened his mouth to speak.

All he had to do was tell her the whole thing was a lie. He just had tell her Richard made it up to fuck her.

And then he'd have to admit that he and Nathan had gone along with it too. He'd have to admit that he was complicit with his friend's deceit of her, and that he'd wanted to exploit her for sexual gain just as much as both of his asshole friends. How would she ever forgive him? No way would she stay in the study group. How could he live if he didn't get to see her anymore? She'd be out of his life forever, and that would be a worse fate than losing his balls.

"I still need some more practical demonstrations! I popped Richard' balls way too fast to learn anything. So...I need to do yours. Slowly."

Of course she did.

"But...you're cute, and I don't want your sex life to end right now! So, here's my proposal: you describe exactly how it feels as I take apart your left ball, and I'll let you keep the right one." She smiled at another deal well crafted. This also meant she didn't have to worry about going too hard on him; if she kept her efforts on the lone nut he was sacrificing, she could put as much pressure on him as she wanted. "You'll get to keep the other one, so it's not even so bad. I know it's a lot to ask, but I really need the grade in this class!"

"Just...just do it." He leaned back on the couch shuddering, his muscles tensed in anticipation of feeling the worst pain a man could feel. He didn't want to lose a nut, but he found it oddly comforting that it was being taken the girl he'd loved from afar for so long. After all, who else deserved to take it from him?

"Make sure to give me lots of details. If I don't learn enough from the first one, I'll have to work on your other nut as well." Melody gleefully moved both hands to the left gland, and got to work. This time, instead of trying to completely rupture just a small part of the nut, she tried to go for smaller breakages all throughout the organ. She started working her way methodically through the outer layer, pinching and twisting to create a minor fracture in one area, then moving her hands an inch over and focusing on an undamaged section. She really didn't want just a sudden pop and rush of euphoria; she wanted dozens of images to remember of his cute face screwed up with pain, his ball in various states of health as she tore away pieces bit by bit. She wanted to know the feeling of every stage of deterioration his testicle was going through.

Shuddering with fear of losing his last ball, he held up his end of the bargain. Each tiny tear brought a shrill update from him on the state of his ball.

Crunch.

"Ohh, you just...you just detached a little piece of it on the left side. Fuck, that *really* hurt, Melody."

Squick.

"I think that part you're pulling on is still...still a little connected." *wrench* "-URK, no you...pulled it off now. Still...still a lot more to go, but- *FUCK* - I can feel you making progress towards the inside..."

Snkt

"It...it feels like you're pulling some tubes apart around-" he was cut off by his own dry heaving as she pulled another tangle of tubules off of the mainland of his nut. Melody was surprised by how intricately packed the little orb was; she'd thought they were just full of goo, like a fleshy balloon, but her explorations with Tommy revealed a center similar to a tightly wound ball of yarn, with infinitesimal seminal vessels criss-crossing each other in a lattice of manhood that she methodically pulled apart.

Finally, she pulled back to admire her work. His left nut was barely defined at this point, the ball of yarn pulled apart into an amorphous mess. But it was still sort of barely intact. She was almost done with her experimentation.

"Now Tommy, I...I have to tell you something kind of embarrassing." She was blushing red, and Tommy noticed for the first time that she had her legs splayed apart without any care if he saw them. His wilting erection perked back up.

"When I pop you, there's a good chance...there's a good chance I'll cum." Her voice quavered, and he realized how close to the edge of climax she was without even touching herself.

"I just...I really don't want you to make fun of me for it. I can't help that I have these fantasies." He managed a shaky smile, barely holding his sanity together through the searing pain. "I...I know, Melody. It's pretty obvious you like it. I'm not going to tell anyone, don't worry. Please, just...just end it for me. It..." He took a deep shuddering breath and his false smile wavered, a shadow of fear crossing his face as he begged for his own half-neutering. "...it hurts so much."

She smiled up tearfully at him. "Thank you, Tommy." She leaned over, wrapped her lips around his cock, and plunged herself down onto the only boy in the study group who could still enjoy a blowjob. He deserved it, after all he was doing for her. She looked up at him and gave him a wink, then clapped her hands together over the left half of his sack.

The gonad finally splattered to mush between her palms. Her task done, one hand flew between her legs to rub herself over the edge while the other squelched his broken ball around in his sack.

But he had been as close to nutting as his nut was to nothing. As she finished altering him, Tommy surrendered his load into her eager and willing mouth.

With one nut bruised but intact, and the other definitively broken, Tommy's orgasm was half intensely painful and half mind-breakingly pleasurable. His right nut seemed to think it was next in line for destruction, and it pumped spurt after spurt of jizz through its healthy tough cords like it would be smashed any minute. His left side tensed painfully and erratically, spewing a lumpy puree of himself down her throat, each tiny lump leaving feeling more raw and emptied out.

Finally, she had enough observational data for the assignment. Melody slid off his cock with a wet POP and a loud *gulp* as she swallowed his semen, then kissed the limp left side of his sack. The boy was breathing deeply and raggedly, but he was still conscious. She smiled up at him, then walked over to the phone cradle. And that afternoon, the local hospital admitted three patients who would be the first of a decades-long line of bizarre testicular accidents in their sleepy little suburb.

Until next time

You made it to the end. Hopefully your gonads are more functional than the ones you just read about.

I love hearing from readers. Whether you've got feedback, a request, an oddly specific scenario you've been dying to see written, a unformatted wall of text meticulously describing each and every ballbusting fantasy you've ever masturbated to, or just want to correct all of my typos, drop me a line.
