Part 1

"Wakey wakey, Mr. Anderson!"

I groggily stirred awake. I was lying in bed in a hospital gown, my legs spread apart with stirrups hanging from the ceiling.

"Sorry for the stirrups. They're meant to make sure you don't irritate your scrotum, so you can heal up properly."

A sharp, biting pain twinged from between my legs. I started to remember the operation I'd been prescribed.

"You're going to take a week or two to finish healing up from your..." The nurse looked down at her clipboard and flipped back a page. "DOUBLE orchiectomy! Wow, that's...that's a serious procedure!" She walked over to the side of my bed and started jotting down notes from the various electronic readouts. "So how's everything feel downstairs?"

"Sore," I croaked out, the weight of my castration starting to set in.

She smiled. "Yeah, I'd imagine. Doc said yours were some of the biggest she'd ever snipped off. But they seemed totally healthy! Are you transgender, or were you just tired of having a sex life?"

"My...my boss."

She frowned down at me. "Your boss?"

"My company...They said I was distracted. That I couldn't stay on board unless I got myself 'fixed,' so I wouldn't look at porn or...or harass any of my coworkers anymore."

Her frown turned into a grin. "Oh...oh my god. That's..." She stifled a laugh. "I'm sorry, I've never heard of a guy *agreeing* to those terms. I mean, with the new laws out, I know it's legal for employers to have you snipped, but...Usually guys just quit instead of going through with it! You must really want to climb that corporate ladder, huh?" She shrugged. "Well, nobody can question your company loyalty. I'll make sure we get the paperwork over to your office before you return to work, so they know that your castration was a total success."

"Oh, and we'll be sending your..." She paused, trying to think of a delicate phrase. "...Your *package* over as well. I believe they're obligated to keep them intact and undamaged until you cease your employment there?"

"Yeah...Yeah. I get them back when I leave, or if I'm fired," I said.

"Well, hopefully that won't happen."

This time, she laughed aloud. I didn't respond. I could only numbly contemplate what my boss had just taken from me.

She straightened up. "I'm sorry, I...I shouldn't laugh. I know this is a big loss for you, even though you did volunteer for the operation. It's just..." She smirked. "It's a little funny that you're actually *hoping* you never get your balls back, you know?"

"Yeah...I guess so."

She cleared her throat and straightened out. "Anyway, I've got everything I need here. Your readouts look fine, other than slightly high testosterone levels for a eunuch. It's probably just the last drops of your male hormones still sloshing around in you. That should drain out over the next few weeks as well, and then you'll be completely free of sexual desire or capabilities."

"Enjoy your boners while you can! Without those two big hormone producers in your sack, you'll start to see those disappear gradually. You'll be permanently erection and orgasm free once your body finishes breaking down the leftover androgen."

"Your manager should come by soon to pick you up. I hope you enjoy being a eunuch!" she chirped perkily as she left the room.

Part 2

"So how are things, nutless?"

I jumped at the sound of Amanda's voice. She was our cute blonde receptionist, and I'd had a crush on her from my first day in the office. I'd always wanted to ask her out when I was a full male, but I never got up the nerve for it. Hearing her talk about my neutering was especially painful.

"I'm fine, I'm just trying to get this report done by end of day. Do you mind—" I turned around and gasped.

I had never seen Amanda like this before. Her normally conservative top was a halter now, the bottom shockingly high to expose her entire midriff and even a sliver of underboob. If that wasn't enough to make it clear she was braless, her large brown nipples poked right through the thin fabric. Even without my testes, the sight was breathtaking. She smiled as I glued my eyes to her cleavage.

"Still a bit of a boob man, huh?"

She giggled as I looked up at her, dumbstruck, and I quickly looked back at my monitor. "I'm so sorry, Amanda, it's just...just a bad habit."

"No, no, it's totally ok! Feel free to look. It's not like I'm wearing this to tease the *girls* around the office." She put her hands around her boobs and squeezed them together, almost popping them out of her undersized top. The compression forced most of her breasts to spill out the bottom, nearly revealing her nipples. "I would never have done this while you were still...you know, a *threat*, but now that I know you can't act on your urges, it's so much fun to play with you!"

"Just think, a couple months ago you probably would've been cumming by now! I know how much of a quickshot you were. I've seen the security footage." My face burned crimson as I tried to ignore her teasing. Knowing that my crush had seen me masturbating *on camera* was almost as humiliating as my castration. "It was so adorable when you moaned my name right as you spurted. You had a bit of a crush on me, right?"

"I...I don't know. I don't know why I did that, I'm sorry, my libido just made me—"

"Yeah, those nuts made you real dumb. I get it." She sighed. "I always thought you were kinda cute. It's so sad when hot guys get neutered."

"Anyway, I just came by to tell you that Diane wanted to chat. Probably a follow-up to make sure you're still doing ok, mentally and physically. I know that operation took a lot out of you. Literally."

Amanda walked away, and I took one parting glance at her round ass. She flipped her short skirt up "accidentally," revealing two perfect, bare buttcheeks. Of course she was going commando. I suspected leaving underwear at home was going to become the norm for the girls who worked near me. I reluctantly gathered my things and headed over to Diane's, dreading a meeting with the woman who had ended my sex life.

Part 3

"Come in!"

I opened my manager's door and walked in. My jaw hit the floor when I saw the jar she'd left prominently on her desk.

"Oh, sorry, I forgot that you haven't seen my new decorations yet! I've been displaying them since you had them removed. It's a GREAT icebreaker for my meetings with the new employees." She grinned evilly. "And it's been a great power move for my meetings with the male higher-ups. It's hard for them to tell me they're cutting our budget when there's a fat pair of severed balls floating in front of them."

"None of us thought you would actually go *through* with getting gelded! We've made the offer to lots of male underperformers before, and almost every single one of them left the company immediately. It's so rare to find a guy willing to go through...that." She leaned over, her eyes glinting. Like Amanda, her top (a barely-buttoned blouse) exposed far more of herself than was professional; unlike Amanda, this wasn't unusual. Diane had always treated the dress code as guidelines for her, not rules; being the boss gave her some leeway us underlings weren't afforded. If her clothing made us uncomfortable, she blamed us for our wandering eyes.

"Why did you do it? You know it's not reversible, right?"

I swallowed uncomfortably. "I just...I really like the work environment here, and..."

"And you know you couldn't get a job anywhere else with your qualifications?"

I looked away from her. "I...Yeah, that too, I suppose. This is just such a good place for me to learn, and grow, and..." I tried to look away from the jar in front of me. "I'm sorry, can you...can you put those away?"

She put her hand to her cleavage, shocked. "Are you kidding me?! You're still distracted by my breasts after your castration?! This is unbelievable! Your sexual desire was supposed to be GONE! Sounds like we'll have to get you on the hormonal adjustment schedule if your operation wasn't enough to curb..."

"No! No. Not your breasts. My...my balls."

"Oh! Of course." She flushed red, grinning sheepishly, then reached over and slid my testicles into a drawer. "Sorry, I know seeing bits of yourself in a jar is probably pretty unnerving. Do you miss them at all? Have things started to, you know...progress?"

I knew what she was asking. "Yeah, I'm...I'm a lot less distracted by my female coworkers. I haven't had an erection in over two weeks...No, almost a month now. I've been really productive at my job, too. Career-wise, it's been...helpful."

She smiled brightly. "Well, I'm glad it's had such a positive effect. We were so worried you'd come back just heartbroken. It's so common that a guy kind of just...gives up once his sex life is gone. It's good that you're putting your mind on something productive!"

"In fact...That's something I wanted to talk about. My boss has noticed your progress, and she really wants to boost participation numbers in the program company-wide. Not every guy needs a full castration like you did, but incorporating testicular damage and hormonal reductions into our performance improvement plans could do wonders for helping properly motivate male employees. There are so many that are just far too horny — like you were — to ever be productive otherwise."

"Ok, so...where do I come in?"

"We wanted you to help us film a little video, to show that the procedure has worked great for you! Would you be interested?"

My heart jumped. "Will...will I have to be present on it? Like, ON video?"

She frowned. "Yes, of course. Is that an issue?"

I shuddered at the thought of every woman in our 50,000-person company branch knowing that I was missing my nuts. "I...I don't think I want to show my face to the whole company like that. I'm a little embarrassed about it, and I'd prefer to keep my condition private."

She rolled her eyes. "Fine, we won't show your face or name. But you *need* to let us get some shots of your empty ball sack! It's so hard to find 'male' models without testes. We'll just do some shots of whatever's left between your legs, and you'll answer some questions for us so the viewers know you're happy with what we've done to you."

"But...won't people be able to recognize my voice?"

"James, everybody who can recognize your voice is *well* aware that you've lost your balls. It's common knowledge around here. I know you're embarrassed about it, but...well, you probably won't be the only nutless guy in this division soon, so it won't feel so weird! That'll be nice, right?"

I couldn't believe I was agreeing to help convince more men to go through castration. "And...and if I don't want to do this?"

She frowned. "Look, I know you think you gave up this BIG THING because you got your balls chopped off, but you have to understand: we were *this* close to firing you before your operation. Having your nuts removed bought you some forgiveness, but we really need to see you show some initiative and take on a little more work if you want to keep your job. This is the perfect way to show us the value you are still bringing to the table. If you turn this down..." She trailed off ominously.

"Ok, ok. I'll do it."

"Great! Come by the presentation room in an hour, we'll start filming then." She gestured for me to leave as she opened her drawer and replaced my balls in the center of her desk. I hurried out.

I opened the door to the large staging room and was immediately greeted by a rushed production assistant.

"Oh, you're the nutless wonder, right? Come on, get undressed, we've been waiting!"

The brunette read my clear shock and rolled her eyes at me, annoyed.

"Christ, come on! We need you naked on set. That's what you're here for, right? We've all been waiting to see what you look like now that you're snipped!"

I reluctantly pulled my jeans down, then took a deep breath and hooked my thumbs beneath my underwear. My briefs slid down, revealing my limp cock and empty scrotum. Her eyes widened with delight as she took in the sight of my nonfunctional manhood.

"Wow! You...It's so floppy! You must've had big balls!" She laughed. "Actually, I *know* you had big balls. Diane's been showing the whole office." Of course she had.

She got right down next to my groin for a closer look. She grabbed my empty scrotum in her hand and rolled it around, pushing her thumbs up into the cavities that my nutcords used to connect to. "It's really empty! Wow, it feels so *weird!*"

"Just lay down on the bed over here." She gestured me over to a large mattress with a camera on a tripod at the base. I lay down and spread my legs as she indicated, giving a perfect view to the glass lens pointed at my groin. "Is...Is my face in the shot?"

"We'll censor all identifying information in post! You don't need to worry about that," the assistant told me reassuringly. "My name's Amber, by the way. Nice to finally meet you, after hearing and...seeing so much about you." She shook her head sadly at my dangly limp penis. "It's really too bad. You look like you had a hell of a cock. If you still had your nuts, I'd have loved to give it a ride."

She sighed. "Sorry, I...probably shouldn't have brought that up. No point focusing on what you're missing now."

"We'll be asking you some questions about your experience with castration, and what's changed for you since you've had it done. Try to answer in a way that puts your experience in a positive light. If you're a good enough actor, you'll soon have a *ton* of other eunuchs to join you in the office! Now just climb onto the bed and prepare yourself."

I climbed onto the bed and spread my legs apart. Amber centered the camera on my cock and scrotum, and started asking some questions.

"So, your manager encouraged you to get a procedure done if you wanted to keep your job here at Over Easy Technologies. Do you mind giving us specifics on what the doctors did to you, James?"

I gritted my teeth at the sound of my name, hoping it would be censored in post.

"They...they removed my testicles."

"Yeah, we can see that. But...more specific, maybe? How did different parts of it feel? The injection inside your balls, the initial scrotal incision, the feeling of your nutcords disconnecting...give us all the details."

"I...I was unconscious. I don't know what they did."

She scoffed, clearly disappointed, and muttered under her breath. "Ugh, I thought we'd explained to them that surgery was supposed to be anesthesia-free. I'll have a talk with the surgeon again. We'll make sure the next guy feels everything." She straightened up

and continued with the interview.

"What are the upsides of your procedure?"

I struggled to remember the list I had been prepared with. "Um...I've been...less distracted at work. I used to masturbate to porn almost every single day during my lunch break."

My questioner cleared her throat. "Erm...Our network logs showed you logging into pornographic websites multiple times per eight-hour shift, and we have camera evidence to prove that you were...stimulating yourself during those sessions. Are you sure you aren't misremembering? It was a lot more than once a day."

"I...I suppose, yeah. I must have..." I swallowed my pride. "Yeah, four to five times a day. I...I was pretty addicted to jerking off."

"And how often do you masturbate now?"

"I don't. I...I can't anymore."

She raised an eyebrow at me. "Wait, really? The doctor told us you should still be able to spurt. You just won't be fertile. It'll be thin, watery goo from now on instead of real cum for you!"

I shook my head. "That's true for some eunuchs, but I...It hasn't worked for me."

"What happens if you try? Give us a show."

I didn't understand. She made a jerking off hand motion to clarify. "Go on, stroke yourself! We want viewers to *really* see how your sex drive changes after castration."

Shaking, I lowered my hand between my legs and grabbed my limp penis. I could feel my hand on my cock, but none of the corresponding pleasure. I tried to stroke the floppy organ, squeezing and tightening my hand like I did back when I had my balls attached. My other hand instinctively went below my cock to fondle my nuts, but I only found my scarred empty sack. I ran the floppy skin through my fingers, futilely trying to replicate my normal masturbation routine.

Amanda ran up beside me, her breasts barely staying inside her top. "Come on, James, I know you can do it! Show us all that the little thing still works." She unbuttoned another button and burst free, pillowy flesh spilling out of her shirt. Her bare boobs were inches from my head, swinging above me, their bottom curve so soft and perfect. I felt a surge of...something run to my crotch. It was like the faintest whisper of the mind-bending

arousal I should've felt at the sight of my crush, naked for the first time in front of me. If I'd still had a full scrotum, I'd have been halfway to shooting my load already. I gripped harder, trying to focus on those two bountiful orbs, their perky brown nipples poking out, erect and supple and so goddamn sexy. My body should know how to react to this. I was sure I could get my limp dick to get hard, or at least twitch, if I just *concentrated* hard enough...

"See?! Totally limp." The crew was awestruck, and a couple of the girls broke out in giggles. Even Amber couldn't help but smile. She turned to the camera, beaming.

"He's stroking his cock, surrounded by attractive women, one with her tits out right next to him, and he *still* can't get hard. This simple operation has had drastically positive effects for James. If you're having trouble concentrating at work, this could be the solution for you!"

She turned back to me and continued the interview. "Our security footage showed that you LOVED to play with your balls while masturbating. I bet grabbing those two fat things and rolling them around in your hands was a lot of fun, right? Really made you feel like a man?"

"Yeah...yeah. I can't do that so much anymore now."

"So do you miss having them?"

I held back tears. I'd missed them from the second I drove home from the hospital. My decision to get castrated was the biggest mistake of my life. I'd been so worried, so terrified of being unable to get a job again if I lost this one that I signed a blank check to them...but it wasn't worth it. I would do anything to have my nuts back down there, instead of floating in a jar on my manager's desk.

"Ye...No. I...I don't miss them at all." I leaned back and sighed. Amber smiled down at me.

"Great, that went perfectly! Thanks for giving us your time, James. And your balls!"

She turned the camera off and I stood up and started to get dressed. The women were going over footage and giggling, chatting over each other as they talked about their favorite parts.

I overheard one particularly interesting conversation thread.

"Oh man, go back to that part where he was trying to jack off! He looks *ridiculous*!"

"Wait, are we still supposed to call James a 'he'?"

"You know we actually caught the last time he ever masturbated on camera? It was the end of one of his shifts, like 20 minutes before he was going to leave."

"He did it *at work*?!"

"I know! The pervert couldn't even wait to make it home. He had just whipped it out in his office and started pumping and *moaning* when security busted in to take him into Diane's office for a talk."

"And that's when she convinced him to have his balls taken off?"

"Yeah! He was SO horny during that meeting because he didn't have a chance to cum before they dragged him upstairs. I bet he just signed the paperwork without even reading it because he wanted to make it out of here to relieve himself!"

I wanted to deny it, but they were right. My boss had talked about getting 'fixed' so I wouldn't spend so much time on pornography at work, but I'd thought she was referring to some corporate seminar that would teach me how to stay on task, not an actual operation. I had only skimmed the contract I was signing before pushing it back to her. As soon as I did, the two security guards dragged me out and threw me into a waiting ambulance, where I was tied up and brought up to the urologist's office for my neutering. I didn't even have a chance at a last sexual release before the doctor put me under and snipped my cords.

"Ok, got all the footage we need, James! Put your pants back up, I think we're done for the day." She took one last look at my empty package, and stifled another laugh. "Wait, first, one more thing!"

She climbed up onto the bed and straddled my face. Her skirt was short, and her red and white panties smothered me as she leaned forward, putting her butt and pussy right onto my face. Her pussylips ground into my mouth through the thin fabric, and I barely resisted the bizarre urge to dart my tongue out and taste her. If I were still a full man, the setup would have made me granite-hard and slick with precum.

"Say cheese, nutless!" I heard the click of her phone's camera, and she stepped off of me. She turned around and showed me the shot from her phone. "What do you think?"

Her left hand was up in a peace sign while her other hand held the camera. She leaned over obscenely, and her plunging neckline gave a view all the way down her bra. Right below her pendulous breasts, the remains of my sex organs dangled inertly, my saggy sack a stark contrast to her tight, perky breasts.

"So? Nice pic, right?"

"It looks great, Amber. Nice...nice framing."

"Thanks! Now hurry up and get dressed, the team's going to go out for drinks tonight! We normally do a Girls' Night Out on Thursdays, and you're invited! Seeing as how you're..."

She realized what she was implying. "Er, not that you're a *girl*, but you know...You're certainly not a man anymore."

I just pulled my briefs up as fast as I could, relieved to finally cover myself.

Part 4

"Did we really have to come *here*?!"

Amber giggled. "It's where we always go! Guys buy us tons of free drinks, and a few of the girls enjoy the dancers."

I groaned. At the stage above me, two strippers gyrated around their respective poles, their narrow thongs and tasseled pasties doing almost nothing to hide their assets. The girls and I took up most of the bar, and I was seated right between Amber and Amanda.

"It's just...really uncomfortable for me after my surgery."

"Really?" Amanda asked, amused. "I'd have thought you'd be *more* comfortable here without balls! If you still had them, you'd probably be rubbing your dick silly to all these hot women, right? That'd be *super* awkward."

I didn't bother contradicting what we all knew to be true. "I...They just remind me so much of what I missed out on. The stuff I never got to do before you gelded me."

"Wait, do you mean..." Amanda gasped in shock, and Amber burst into laughter. "You *never* had sex!?"

I shook my head.

"Oh...oh my god! We all had these crazy theories about why you agreed to get your balls cut off, and I thought...I thought you were like, a sex maniac, and you wanted to set yourself free, but...You gave up your nuts without even knowing what sex felt like?!" Diane wheezed hysterically, obviously a little tipsy. "You must *really* love this job!"

The waitress approached us, mercifully ending the painful conversation. "Can I get y'all anything? Drinks, snacks, or a private dance?" I was about to close out the tab, but Amber cut me off. "Jack and Cokes all around! And get us a lap dance for our friend here, he's going through some rough times."

The waitress frowned sympathetically and nodded. "He does look a bit down. Is it a bad breakup, honey?"

"Oh, the *worst*!" Amanda chimed in. "He had been with his partner for almost his whole life, and now they're gone. He's too shy to talk about it, but we can all tell he really misses them."

"We'll get you someone to cheer you up, don't you worry! We got the most popular girl here tonight. Shardene, get over here and show this boy some love!" I tried to protest, but Amanda covered my mouth to keep me quiet.

Shardene walked over, and it wasn't hard to see why she was the most popular. She was *gorgeous*. Her skin was a creamy cappuccino. She had toned thighs, plump breasts, and a frizzy afro that haloed her perfect smile. She exuded equal parts sexuality and innocence. Her sheer black thong barely contained her round, juicy buttocks. I could easily see her short-haired pussy lips beneath the garment.

She stepped down from the stage and straddled me. Her pussy was only a few inches separated from my useless manhood, and her breasts pushed into my face. She smelled of beer and perfume and intoxicating woman scent. She leaned forward more, shoving my face into her breasts, and started grinding her pussy against my crotch. If I weren't castrated, I would have cum from that much alone.

Then she began whispering in my ear.

"Don't worry about those girls, baby. You've got a hot young thing riding your fat cock. C'mon baby, I know you want me. Get that big prick hard for me, so I can take this thong off and fuck you. I need it deep inside my..." She frowned, and grabbed me between her legs. "Uh...Get that thing...Jeez, dude, what do you need from me?" She batted at my unresponsive crotch. My coworkers were laughing hysterically.

Diane finally chimed in. "I'm sorry, he...he had his testicles removed recently. So sorry for wasting your time!"

Shardene's face relaxed, and she looked me in the eyes pityingly while slowing down her humping. "Are...are you serious?" She reached into my waistband and fondled my scrotum, rooting around for my missing organs. Her face dropped when she realized Diane had told her the truth. "Oh my god! That's..." I could tell she was trying to be nice, but she failed to stifle a giggle. "It's alright, you're still...still sort of a man! At least you still have your cock. Even if it doesn't really, uh...*respond* anymore." She snorted. "Jeez, you have some asshole friends if they brought you to a strip club. Talk about a frustrating experience!"

"It's...It's ok. Thanks for the dance, you're very attractive. I wish..."

"Shhh, honey, you don't have to say it. I know you would've been rock hard underneath me if you still had your balls. I'm sure you were quite the stud back in the day."

I didn't bother to correct her. I paid our bill as my coworkers beckoned me to follow them to the cab.

Part 5

"Are you ready for the meeting, James?"

I wasn't. I rolled my eyes and sighed in protest. "I don't get why we all have to watch the video together like this. Can't we just email it out, have people watch it on their own time?" Or not at all. I was not looking forward to the entire team seeing me on display, and I had no interest in seeing another angle of my empty scrotum.

"You know it's mandatory. It'll be fine. It's not like it's anything you haven't seen by now. And you know how sensitive she is to people skipping meetings." I followed her reluctantly and took a seat in the auditorium.

The room dimmed and the video played. Diane looked down on us from the giant screen, smiling sunnily as she began to describe my castration in nauseating detail. As per usual, her shirt was only halfway buttoned up. The execs must have chosen her to explain so she could distract half of the employees from paying attention to the gruesome details of her PowerPoint. I could still recognize that she was breathtakingly beautiful without a male sex drive, but I couldn't believe how blatant her tactics were. How could anyone fall for this? My manager mimed the removal of the glands on screen, pretending to pull them away from her invisible subject and scissor through the cords with two of her fingers.

I tried not to imagine the nurses doing that to my own balls. Some of the men around shifted uncomfortably, clearly unsettled by the imagery, but most were too entranced by her body.

Her cleavage pushed out through her top in the background, and a bra cup slipped off for an instant, exposing one of her wide, dark nipples. One of the interns went wide-eyed and started to twitch as a dark patch of cum spread out wetly from the bulge in his pants. Almost all the men were completely entranced by her body. If I had been as gullible as they were...No wonder I'd fallen for her trap.

"And now, a shot of our latest volunteer, James Anderson!" I gasped in horror at my full name. I couldn't believe it. These women hadn't just taken my nuts...they'd outed me to every woman at Over Easy Tech. I turned to Diane angrily. "Is this the final cut of the video? The one that's going out to the WHOLE company?!"

She bit her lip guiltily as she realized the error. "Oh shit, they didn't...Um... Wow, I'm really sorry about that. I swear we'll be more sensitive next time. We...there were a lot of moving parts in organizing this meeting, and getting the video ready, and it looks like

someone forgot about your request for anonymity."

My image came on screen. My face was fully visible in the shot from below my perineum, but that didn't matter. The producer had seen fit to include my company email and ID photo below, inviting any curious attendees to message me for more information. Above, my neutered genitalia were blown up on a screen the size of a movie theater, a veiny deflated balloon hidden by a dead cock. My voice rang out through the speakers, and I could hear the soprano timbre that had been creeping into it the past couple months as I answered each question.

All the women were giggling, only some having the courtesy to try to stifle it. The men were confused, and horrified. I could see it dawning on their faces as they learned the truth about these girls: Manhood is a *joke* to them. They have no empathy for how drastically they change a man's life by taking his most vulnerable bits. How could they? Pussies are so tight, tucked inward, neat and clean and impossible to hurt. Testicular ownership is a completely foreign concept to them. I spent my whole life loving and relying on those two little lumps I thought I had been blessed with, and they just...took them from me. Forever.

I leaned back and sighed, closing my eyes so I would only have to hear, not watch, myself masturbate fruitlessly on the big screen. On the screen, Amanda leaned into the camera, her elbows pressing her breasts together to expose creamy tracts of flesh. Her face and ID badge had been scrubbed out, replaced with static.

Part 6

Of course it leaked.

Everything except me did, these days. The slightest hint of a new product from our company made it into tech blogs across the internet months before it was announced, so why wouldn't this video? Someone had furtively filmed my entire interview during the company-wide airing and thrown it to the internet hounds.

It became a viral hit. Girls started taking the "Chopped Balls Challenge", to see if they were sexy enough to make a eunuch cum. They would put together montages of themselves specifically for me, bent over with their pussies right in the camera, moaning my name as a boyfriend or dildo fucked them silly. Every woman in every video begged me to send them pictures of any cumshots I produced so they could post them on their Facebook or Instagram. I didn't send them any, but not for lack of trying. I still enjoyed watching them, but no matter how much I tugged and rubbed, my body wouldn't cooperate.

Eventually, hackers doxxed my various fapping accounts and gave the information away, and girls started tailoring their acting to what they thought pushed my buttons the most while still taking every opportunity to remind me that I'd lost my nuts. My company inbox was filling up with constant spam, from both employees and outside fans. The worst was the submissions from people I knew. Girls I'd jerked off to in high school, girls who rejected me in bars, friends and friends' exes, acquaintances, and even teachers and doctors I'd had throughout my life had all gotten in on the challenge. No woman seemed too reserved to get naked and have fun on camera for me now that I was a eunuch.

News reporters condemned my harassment and YouTube blocked the videos, but people found other platforms, and new videos continued being produced long past the expiration date of the average viral sensation. I could barely get work done with the deluge of nudes I received, and I began missing important emails beneath the waterfall of porn. My work output started dropping. I knew I had to work my hardest if I wanted to keep the position I had paid so dearly for.

Today was a Monday. I was scrolling through the batch of videos and naked images that had come into my work email over the weekend.

A frisky ginger divorcee was sure her ample bosom and unique talents could make me squirt for her. She'd never failed to drag a load out of her husband, "even when I have him by the balls!" She demonstrated her talents by wrenching his poor testicles on camera, eliciting a dribbling, painful cumshot all over her massive freckled boobs. He cried throughout the process, yet I couldn't help envying him. Ruined orgasms were better than none.

Shardene had a couple videos she'd taken from the secret camera in the backroom of her club. This time, she was servicing two men who had paid for "Deluxe Service." She'd give knowing glances directly into the camera on occasion, waggling her eyebrows suggestively like she was looking right into my eyes. The video ended as she expertly made the cocks in her mouth and pussy finish at exactly the same time, and as the men left, she turned around and spread her pussy to the camera, male and female love juices flowing down her leg. "Thinking of you, cutie pie. Hang in there, I just *know* we'll figure out how to make you cum one of these days!"

A group of gorgeous Asian girls had teamed up in a group effort. They dressed up like a K-Pop band whose videos I used to masturbate to, and each acted their character's part perfectly in an impressive hour-long orgy. The subtitles informed helpfully that the girls wanted me to "squirt my not boy water seed because of golden egg loss!"

And finally, Amanda had brought home some boy last night. She was bent over with the camera in front of her, her faceless companion fucking her from behind. His balls slapped against her loudly, and she gave this gasping half-smile with each thrust as he filled her up. He made her cum fast, her expression changing from happiness to ecstasy, gasping my name and moaning pornographically. She shuddered as she shoved back roughly against his rock-hard cock, getting the most friction she could from his member. Those were my most loved and most hated submissions. Seeing my crush fucked by some nameless barfly was heartbreaking, but it was also the closest I could get to feeling like a real man. I managed half an erection while jerking to today's video. As I scrubbed the beginning of the video, a notification popped up on my phone.

Surprise meeting with Diane, in 5 minutes.

I sighed and let myself go. My cock immediately shrank into a useless nub, and my libido died like a spark in an almost-lit fire going out. I pulled my pants up and left the single-occupant bathroom. I didn't have time to jumpstart my libido right now. I couldn't risk being late to a meeting with my boss.

My balls sat prominently on her desk in front of her. She was smiling sweetly, but I knew it wasn't good news. Not for me, anyway. The last time Diane had that smile plastered on, the meeting had ended with me being dragged into an ambulance. At least I knew this one couldn't go that badly.

"Hi James. Thanks for making it on such short notice." I focused on meeting her eyes instead of looking at the jar.

"Is everything ok, Diane?"

"Oh, yeah! Well, mostly. There's been some restructuring, and...Oh, I'm sorry, I hate these kinds of meetings. Trust me, I enjoy this as little as you do."

"...Ma'am?"

"Please sit down. I was just reviewing your file..."

Until next time

You made it to the end. Hopefully your gonads are more functional than the ones you just read about.

I love hearing from readers. Whether you've got feedback, a request, an oddly specific scenario you've been dying to see written, a unformatted wall of text meticulously describing each and every ballbusting fantasy you've ever masturbated to, or just want to correct all of my typos, drop me a line.
