

The First Guy I Ever Ballbusted

by Preun BB

You want to know about the first guy I ever ballbusted?

It was in college, freshman year. I was at this party, and this one guy was just NOT leaving me alone. I mean, he was ALL OVER me, and it was obvious he just wanted to sleep with me. His little boner was making a tent in his pants, I mean, it was just sad. He was just too horny to leave me alone, and I decided that needed to change permanently.

I led him up to my room, pretending like I was into him. Once we closed the door, he immediately started to get naked, not even asking me if I wanted to have sex with him. His cock was tiny, of course, but his balls swung down REALLY big and low. I knew this was going to be a lot of fun.

I put my hands on his shoulders, looked him in the eyes, smiled, and kneed him in the balls as hard as I could. They felt squishy and...kinda pliable? Like, I could REALLY feel them squeeze when my kneecap connected. It was *hilarious*! I'm pretty sure even if I'd let him go right then, that first knee was hard enough to break something inside of those swollen blueballs.

But of course, I didn't let him go then. I was mad, and I didn't want any more women to have to deal with this guy. He needed to learn a permanent lesson.

He collapsed onto the ground, and I swung my foot back and punted it hard into his crotch, crushing his balls up into him again. He tried to move his hands to protect his nuts, but he was too weak from the pain to put up much of a fight. I slammed my foot into his crotch again and again, each hit connecting directly with one of his swollen testicles. I could tell that each of my hits was tearing his balls apart, making their delicate insides churn into mush. It felt AMAZING.

I finally stopped kicking him and knelt on the ground, reaching one of my hands between his legs and my other hand between my own. I rolled his swollen balls around, feeling for each rupture I'd added to them. He squealed in pain as I pressed my fingers into the raw areas of his testicles. Something was definitely broken in there, but he was still partially functional as a man, so I knew my job wasn't done.

My other hand went to work between my legs. I couldn't help but get incredibly wet at his shrieks and moans. Boys in ballpain just get me so hot and horny. I squeezed my thumb into one of his nuts, and something kinda...shifted inside it, and I knew that *had* to hurt. He was screaming incoherently, babbling about wanting me to stop, how he wanted to have sex or have kids or some other stupid reason why I shouldn't pop his ball. I ignored

him and just kept pressing my thumbs deeper into his nuts, pulling them away from his body on his fragile taut nutcords. They were stretched out SO far, like a pair of rubber bands about to snap.

The craziest thing was, his little cock was still hard through this whole ordeal! It was bobbing up and down, dripping precum all over me as I crushed his ballsack. The little dick pervert was actually *enjoying* his own castration. I squeezed tighter, angry that he made a mess on me.

I was starting to get close to cumming from crushing his balls and masturbating. I was rubbing my clit faster and faster, my hand squeezing around his balls tighter and tighter, when suddenly his left nut exploded. It happened so fast, it took me a second to realize what I had done. The previously intact organ had suddenly turned into so much useless mush sloshing around in his sack. I squeezed hard, twisting his ballsack around in my hand and liquifying the last few bits of his broken ball as I started to cum, HARD. It felt *amazing*.

After I finished cumming and he finished screaming, I leaned back, content and shaking. He had passed out from the pain of losing his nut. He was laying down, spread eagle, and I could see his half-broken balls hanging down between his legs. His one good nut sat there, taunting me.

I knew what I wanted. I needed to pop that last nut.

I stood up, shaking from my afterglow. I stood above him, my bare foot hovering dangerously above his last bit of manhood.

I stood above him, pressing my bare foot down gently onto his last bit of manhood. Then I pressed down harder and harder, and I could feel his ball start to flatten as more and more of my weight came onto it. The mushy nut was starting to change shape beneath my toes.

It must have hurt him, because he suddenly snapped awake. His eyes were bloodshot, and he looked up at me sobbing, begging me to let him keep his ball. I leaned forward, putting most of my weight onto my single foot, and shoved my pussy in his mouth. I told him, "If you get me off, I'll let you keep that nut", and he starting eating me out so enthusiastically

I gave him a real chance, honestly. He just didn't make me cum fast enough. Right before he pushed me over the edge, I put the rest of my weight onto his testicle, and it just...gave way. One second, I was held up a few inches off the ground, and the next I was

standing on what felt like an empty water balloon. Just *Smash!* Both ends of it blew out, and the insides of his ball came squirting out into his sack, joining their destroyed brother. Right then, I came all over his face. It was SO hot knowing I had just ended a man beneath my foot.

And for some reason, I have NO idea why, but RIGHT then...he came. Like, he came A TON. Just shot after shot after SHOT of pink semen, spurting everywhere, making a mess of my skirt at the carpet and everything. I mean, I'd never SEEN a guy cum that much! I found out later it happens every time you castrate a guy. There were little chunks in his cum, even, so I think he might've cum some of his own balls out of himself! It was hilarious, and seemed like it was SO painful for him!

Finally, he finished. It was a mess, but I couldn't feel that mad at him. It was his last load, after all! Literally the last time he would EVER produce semen, and he just ruined his orgasm without even being touched by me. It was almost flattering, he must have thought I was SOOOO hot.

He still needed to clean his mess up though. I scooped up the fertile goop from my hardwood floor, getting as much of the mess as I could, and slid it into his open mouth. He was barely conscious, and he coughed at the thick slush of cum and manhood as it slid down his throat. He was too weak with pain to stop me, though. I scooped up handful after handful, feeding his thick cum and bits of ball to him. I could've saved it, put it in a vial and had it frozen for him, maybe even kept enough to help the doctors fix his balls up. But it felt like poetic justice to have him eat his own last load. I hope he enjoyed the taste of his last chance to ever have children.

Until next time

You made it to the end. Hopefully your gonads are more functional than the ones you just read about.

I love hearing from readers. Whether you've got feedback, a request, an oddly specific scenario you've been dying to see written, a unformatted wall of text meticulously describing each and every ballbusting fantasy you've ever masturbated to, or just want to correct all of my typos, drop me a line.
