Chapter 1: Left nut

Officer Alice led her suspect into the soundproof interrogation room and handcuffed him to the strong metal spars on each side of the table. She had initially picked him up on a speeding ticket, but when his name got a database hit on a suspect in 16 open rape cases (4 of them underage), she had brought him to the station for further questioning.

She was so glad the enhanced interrogation measure had passed city council last year. Ever since cops were allowed to use testicular torture in their suspect interrogations, conviction rates had gone through the roof. The tedious process of gathering evidence, finding witnesses, and working criminal informants was replaced by a few hours of squeezing and kneeling that inevitably gave them a perfect confession of anything remotely illegal the suspect had done.

Of course, as with all police work, the whole process was muddled with bureaucracy and paperwork. She couldn't blame the brass for it; unrestricted testicular punishment would lead to every petty thief leaving the station with a sack full of mush. The more serious the crime, the higher the level of violence allowed was. Shoplifting could usually only allow officers 50 knees or less to extract a confession, while murder and rape would usually warrant complete nullification. For a case like Ivan's, she knew she wouldn't be allowing him to leave with anything between his thighs.

"Why...what's going on?"

She looked up at her hapless suspect. Of course, she still hadn't explained what he had been brought in for; if a suspect knew how serious the charges against them were, they would stop at nothing to save their oh-so-precious manhood. She looked down at her clipboard, and smiled at the fact that the checkbox for "testicular rupture" had been filled in. She was authorized to use the force she needed to get her confession.

"Your name is Ivan Miller, correct?"

"Yes, officer. Can I...I can pay my speeding ticket, if you let me go. I'm sorry if I was rude or anything, but I...Can I get my lawyer?"

"Of course. We just need to get a few things straightened out first, Ivan, and then you're free to go."

She pulled out the photo array of his victims and laid them out one by one on the table in front of her. "I'm going to need you to state, for the record, that you have raped all 16 of these women."

He feigned a look of horror. "What...what the fuck are you talking about! I was just...I was going 10 over the freeway, I'm not a fucking rapist!"

She smiled. Of course that tactic never worked, but she needed to demonstrate that she had given him a chance to confess before she began her work. "Well, we'll see about that." She grabbed his basketball shorts and yanked them down. His boxers followed after, and an impressive set of cock and balls flopped out. Another match; all of her victims, although they hadn't gotten a look at their attackers face, described his manhood as thick, about 7 inches erect, circumcised, with hefty testicles beneath. This matched Ivan's to a T.

She opened her toolbox and started going through the many pairs of needlenose pliers. Most girls started with manual stimulation, due to the danger of a premature rupture with the pliers. Alice found the precise, directed pain the pliers could induce allowed her many angles to attach the testicle, and her experience prevented her from rupturing one too early (usually).

Dragging the process out was key. Early on, officers had popped both of the suspect's testicles right away, which was extremely satisfying, but left them with little leverage to apply to get a confession. The standard procedure was to gradually destroy one nut, which almost always got a confession. Getting the man to confirm his confession during the final castration secured his guilt fully, in the eyes of the city court.

She selected the third biggest size, and measured his left testicle in its jaws like a pair of calipers to make sure it fit. By this point, Ivan had started jabbering, although still wouldn't confess.

"Oh god, this is about that proposition they just passed?! What the fuck, I didn't...I'm not your rapist! Don't pop my balls, please! I swear I'm innocent, you can..."

Alice squeezed her hands together just an inch, and the sharp-nosed pliers sank cruelly into the nut. Ivan shrieked in pain.

"Confess, and this will all be over."

"I swear, I didn't...I just, I was speeding, I know, I..."

Another squeeze, and Alice felt a bit more resistance. She was getting into the meat of the nut, where the nerves were clustered together much stronger. Ivan was openly bawling.

"We know you did it, Ivan. We have an exact match on your cock and balls. We have your name confirmed by over half of the victims."

"If you give us what we need now, we don't need to complete our entire interrogation procedure," she lied.

He looked at her dazedly. "Interrogation...procedure?"

"Castration." She smiled down at him wickedly. "As well as draining the scrotum of remaining testicular substance, to prevent repair later. Oh! And in your case, it looks like..." She looked down at her clipboard. "Penectomy as well. That'd be removal of your penis at the base, that is."

She feigned concern, even as she tightened her grip on the pliers. "Do you want us to have to go through all that with you?"

His eyes widened at her words. "Penect...You're going to neuter me?!" His wail filled the tiny room as his fate dawned on him. He hadn't even had a chance to have children, and this bitch cop was going to cut his cock and balls off.

"Not if you confess, Ivan. I'm only doing this so we can make sure you're off the streets. I don't actually enjoy hurting you," she lied again. "So...?"

"I don't...I didn't...."

He couldn't finish his sentence as the pliers almost split his nut in half. Alice had squeezed hard at his lies. She couldn't believe it. This stupid fucking rapist had a chance to save something of his manhood, and he couldn't confess to his crimes.

She twisted the pliers around, his nutcords wrapping around themselves once and once more. Two twists was the limit most nuts could take, and Ivan's managed to hold its shape, although she could see near the back of the nut where the cords were being pulled out hard.

"So we're going to have to do this the hard way, then."

She took a specialized testicular clamp out of the toolbox. It looked like an old-fashion clothespin, except it was made of metal and the jaws came together much tighter. She pinned it across the cords of his nut, prevent it from untwisting. She released the pliers,

and was happy to see the long dimple they had formed in the nut didn't quite go away when the testicle reinflated.

She went back to her toolbox, putting the pliers away and taking out ten long needles. They varied in shape and size. The thinnest was as sharp as they made, and as thin as a hair. The largest was almost as dull as a ballpoint pen, and covered in tiny hook-like barbs to maximize tearing functionality.

"What...what the fuck..."

She turned around in surprise. She was surprised he was still verbal. Most men had lost their minds at this point in the questioning, but Ivan seemed determined to continue his bullshit. "You're going to...you're going to shishkebab my nuts? When I didn't even fucking...do...where is my lawyer! I know my rights!"

Christ, he was annoying. She pulled the much-used ballgag out and popped it in his mouth, securing it so she didn't have to listen to him anymore. Of course, he wouldn't be able to confess now until she had popped his ball and removed the gag, but she was sure the court would understand her methodology.

"You could have avoided this, you know." She got down on her knees between his legs, and lifted the pinned left nut up. Her abuse had swollen it considerably, and it easily had enough volume for all of her pins. She chose the thinnest needle first, and pierced the afflicted testicle from the bottom. She continued pushing it in gently until she was sure she had hit the core of the testicle, then she torqued it one way and the other gently. She didn't want to break the needle inside of him, and his nut was still pretty tightly packed, so she was barely able to move the needle. Completely unsatisfying; the vast majority of his nut was still solid.

She selected the next needle, a slightly thicker gauge with a fairly sharp tip. She wasted no time jamming it deep into the nut perpendicular to the first one. She pushed this one until it came out the other side of the nut and its tip scratched gently against the other testicle. She could put a little more pressure on this one as she pushed it one way then the other, causing two funnel-shaped marks on each side of the nut. She even felt it scratching the outside of the other nut, and Ivan let out a pathetic whimper as his uninjured right testicle felt its first abuse of the night.

"You could have just fessed up right away." Satisfied with her progress with the second needle, she chose an even larger one next, just 3 sizes down from the giant, castrating one on the end. This one was nearly 0.7 mm across, and had tiny threads down the side, so it could twist into the nut like a screw. She pushed it in slowly, perpendicular to the

cross the first two needles made. This one would poke into the back of his testicle, into the soft, tender area where his spermatic cords were stretched taut away from the nut. This would hurt far more than the previous two.

"Now you're going to have to lose AT LEAST one nut. Probably both, if we're being honest." She smiled bitterly up at him. "You're quite stubborn, apparently."

The rapist was crying openly. Tears streamed down his face as he tried to deal with the hellish agony of his nut. The two needles spearing his nut felt like harpoons, and he could tell Alice had already done some irreparable damage. He gasped into his gag as she began to screw the third needle in.

The needle poked out the back of the nut, and kept going, poking his scrotum taut like a tentpole before bursting through. "Oops, a little too far. Sorry about that," Alice said sarcastically as she pulled it back, stripping the threads of testis meat the needle left on its journey through the nut.

"Well, at least we don't have to be precise with this last one." She picked up the biggest, cruelest needle and smiled up from between his legs. He looked down at her terrified, this hot cop kneeling between his legs, getting ready to half-neuter him.

"Say goodbye to it, Ivan."

She couldn't tell if it was words, or more mindless whimpering, but he responded with something.

She raised the needle high, and shoved it in. It tore through the flesh into the core of the nut, where the previous three needles intersected perfectly. The previously solid nut jellified almost immediately; her previous insertions must have weakened it much more than she had thought. The signature squelching sound that accompanied a man's testicle giving way echoed out. Ivan passed out, and she stood up and wiped herself off. She knew she had a bit of time until her guy woke up for the rest of the interview and she needed a break. She stepped outside the room and locked the door from the outside.

Chapter 2: Right Nut

Alice swung by Lieutenant Maria's desk, fresh coffee in hand. She knew Ivan would probably take at least half an hour to come to, and the clamp should prevent any major bleeding. She could relax and talk to her friend for a bit.

"How's it going in there?"

"Pretty good! Just finished the first one."

"Oh, nice! He's signed the statement?"

Alice frowned. "Not yet, he's been pretty stubborn. They gave me penectomy on this one though, so I've got some leverage."

"Surprised you'd get full-pop privileges here. You just picked him up, right? Clearance for that usually takes a couple days."

"Full-pop privileges?"

"Yeah. You haven't heard? The city's been cutting down on total castration. They think leaving guys with one nut could reduce recidivism. You know, they tend to be more scared of us when they still have something to hurt."

Alice looked at her paperwork more carefully. Under the rupture checkbox was two smaller checkboxes, almost illegible to her. Only one of them was checked.

"Goddamnit! They only gave me one nut on this?!" Alice sighed. "Guess we'll move onto the dick next."

Maria shrugged. "You should've taken longer on that one. You popped the correct one at least, right?"

"What are you talking about?"

"You're given rupture privileges on a testicle-by-testicle basis. The city thinks there's a qualitative difference between left and right testicles, and they'll only give you permission for a certain case based on..."

Alice squinted at the letters next to the boxes. The checked box was marked "R".

"...And theoretically, what would happen if I popped the wrong one?"

Maria rolled her eyes. "Then you'd have to fill out additional paperwork requesting retroactive approval on a double rupture, which...Frankly, it's impossible to get."

Alice threw her paperwork down in frustration. "God damn it! This city does anything it can to protect this fucking rapist's balls!"

Maria looked shocked, then a smile crept over her face. "Oh, he's a rapist? That makes things SO much easier. I can help you out, hon. It's past hours, but I can give the commissioner a call to declare an elevated level of discretion against him, and well...We can pull a few strings to get things through in time."

"Thank you SO much. I still don't have my confession, though."

"Well, that should be easy now. You've still got permission to pop the other nut, right?"

Alice looked at her, puzzled. "But...I already popped one."

"The city doesn't look at it that way. In fact, if you leave him the other, the city might judge you as shirking your duties in questioning."

"So...I can finish him?"

"Of COURSE!" Maria smiled at her. "Good luck in there!"

The door to the small room swung open, and Ivan flinched reflexively as his eyes adjusted to the sudden light. He felt groggy, and he could tell something was deeply wrong with his balls. He looked down in horror at the remains of his scrotum. The left half was shredded to bits; it looked like the cop had torn it apart to allow the mushy remains of his nut to leak out. The clip on his spermatic cords prevented the blood from draining, but nothing kept the mushy remnants of his once-impressive left testicle from draining out onto the floor.

The right ball was relatively unmolested, barring the slight scratches her second needle had left. He leaned back and tried to will himself to unconsciousness, so he wouldn't have to feel the next part.

He failed.

Alice closed the door behind her and turned the lights on. Her subject was still sitting there, legs cuffed wide apart to allow her access to the remaining genitals. She cleared away the testicular muck that littered the ground, then got on her knees between his legs.

"Anything you want to confess to, Ivan?" Nothing. He was pretending to be asleep.

She poked her thumb into the gash in his scrotum, and dug her nail into the scratches she had left in the last nut. She felt them widening as her nail slid deeper in, and Ivan couldn't fake it anymore. A shriek alerted her to his consciousness.

"Good! You're awake." She jammed her forefinger into his scrotum to join her thumb, spreading her other fingers out so the gash in his scrotum tore wider and longer. She found the nugget she was looking for and pulled it roughly out. It was bigger than she expected; nearly the size of a chicken egg. She pulled it toward herself roughly, and Ivan grunted as his body was brought down with the taut nutcord.

"Now...What can you tell me about the crimes you committed on the poor young ladies present in this photo array?"

Ivan couldn't focus on her words. All he could do was stare at his own remaining testicle, fully extracted from his body. The translucent little orb felt impossibly sensitive outside of its protective sack. Alice rolled it around firmly, as if searching for any weaknesses. The tears that were now fully open began to burn horribly, and Ivan felt like his nut skin was being rubbed off.

"I'm not going to use any tools this time. I prefer a much more hands on approach for our next round." He moaned what might have been a sigh of relief. "I find, with the precision of my manual method, I can drag things out much longer. With tools, it's always so tempting to just...END things a little early."

She turned her attention to the scratched side of the lone testicle, now swiftly becoming the weak spot into his nut. She pressed her finger into the raw nutmeat, and was pleased to feel them sink in without the characteristic pushback of the *Tunica albuginae*. Her ministrations had rubbed off the outer layer on this side of the nut entirely.

She backed off before she pushed through entirely. The nut was already far more gone than she expected it to be. She was a professional. She couldn't pop this before her official job was done.

She stood up and took his ball gag out. "Anything to confess to, Ivan?"

He looked at her dazedly. "Every...everything. I did it all."

Her face lit up. Finally! She had gotten the shitbird to talk. "What did you do, exactly?"

"I...I raped them. I'm the rapist. Just don't...don't pop it. Please, I need an ambulance...I think...God, they can save it, I hope."

"Places and times, Ivan. The court won't be convinced by something as vague as that."

He looked up at her in despair. "Places, and..."

She sighed. He still couldn't give that up. He probably got off on withholding a true confession from her.

"Ok, have it your way then." She stood up, pulling him up off his chair. He scooted awkwardly up to accommodate the cuffs. She put her knees on his shoulders, and looked into his eyes. "Last chance to save your ball. Give me some concrete details on your crimes, so the jury knows you did them."

He stared silently at her.

CRUNCH

Her knee pistoned up, and squashed the nut into his unforgiving pelvis. Chunks of nut matter squelched out the weakened side, which had given way entirely. The remaining testicle looked like a bag half-full of water. It sagged in on itself dangerously, implying its remaining contents weren't entirely solidified anymore. Ivan shrieked girlishly. Half of his nut felt like it was on fire, its innards obviously badly damaged from her efforts. The other half felt dangerously cold, and he lost sensation in it entirely as it dripped out of his sac.

"I bet you had no idea today was going to end like this. You probably thought you were going to get away with it, right? You probably jacked off this morning, not knowing it would be your last chance to cum."

"Were you planning on having children, Ivan?" She cradled the badly damaged nut gently. "It's still possible, you know. I've seen what the doctors at the hospital can do." She pinched the open side of the nut closed. "It'd be smaller, and might have a slightly lower sperm count, but...you could probably keep half of this nut."

She squeezed gently, and another slimy chunk of testicle came free from the inside of his gonad and slithered out of the sac. "Just tell me everything, Ivan. You can save your manhood, or at least a part of it. Sure, you'll spend the rest of your life in prison, but...you won't be a eunuch, at least!"

He looked down at her in despair. "I...I don't...I didn't... Please, my wife and I...I want kids so badly...I swear, I never..."

She frowned. "You better not be going back on your story. We worked so hard to get you this far!"

"I didn't do..."

SQUELCH

Alice sunk her thumb into the testicle before he could finish recanting. The remaining ball meat squirted out, joining the rest of the whitish mush on the floor. The nut hung there limply, like a popped balloon. Alice dug her nail deep and yanked the dead nut off of its cords. Ivan's body gave another stiff jerk before going limp again. She applied another clamp to the dangling cords and left the room, slamming the door angrily behind her. Still no proper confession. At this rate, she'd tank the clearance rate for the whole squad.

Chapter 3: Just

Alice collected herself. She knew what she had to do. She double checked the form; the "penectomy" was clearly marked. Her last piece of leverage to put away this sick fuck.

She grabbed a couple medicine bottles and entered the room one last time.

Ivan awoke to the feeling of Alice's strong hands on his throat, massaging three pills down him. Before he could struggle, he swallowed all three of them. He instinctively tried to grab his scarred crotch, but the cuffs held strong against his futile attempts.

"Honestly, it's quite impressive, Mr. Miller. Most men have more love for their testicles than this."

"What...what did you just..."

"Oh! I'm getting tired of you passing out after every round, so the first one of those pills is to keep you awake through the entire next part. The blood coagulant should help you avoid bleeding out during the remainder of our session. Wouldn't want the court to charge me with mistreating a suspect, after all! And of course, it's hard to work on a limp, little flaccid penis, so the last one will keep you rock-hard. Savor it; this will be your last erection ever! Without your balls, your body isn't producing the hormones you need anymore to keep that thing hard." She paused. "And I'll be cutting your dick off, so that'll make getting erections difficult." She laughed at her own joke. Ivan didn't seem to find it as funny.

She reached out and stroked the rock-hard erection. It bobbed wildly at her touch, and he let out a pathetic moan. "You can still feel a little pleasure, right? I mean, I know I destroyed your sex drive," she giggled, "But there's still some residual testosterone floating around inside you. It'll take your body a few days to flush that out. So for now, you're still...kind of a man. I mean, you can't really cum, or produce a sperm sample, but...Well, you're a lot more manly than you're going to be next week."

His bloodshot eyes swivelled to her. She saw, finally, the total defeat in him. He surrendered.

"Maple Street and 16th. The...the Asian one. Last Saturday. It was me."

Alice's eyes lit up. She looked up at the camera to make sure the recording light was on.

"Fucking FINALLY! Now, was that so hard?"

"Just...please don't cut my dick off. You've already taken my balls. Please, I'll...I'll sign anything you want."

Alice smiled sweetly at him. "I know you will, sweetheart. Now, let me finish my job here." She picked the gag back up and secured it to him, as he screamed in protest. With the correct details of one of his rapes on tape, she had confirmation that he was their suspect. With that out of the way, she didn't have to listen to this asshole anymore. She could focus on the task at hand.

She wiped the larger chunks of testicle matter out of her way between his legs, and sat down cross legged with her toolbox. She dug around until she found the scalpel she was looking for, and a few dozen tiny baggies. She looked up at the despairing rapist, and feigned sympathy. "Sorry big guy, I can't cut the whole thing off at once. Department policy states that I'm not authorized to remove more than..." She flipped to the second page of her clipboard. "One cubic inch at a time. With a cock this big, this will take us quite a while. Sit tight!"

"Let's start with the tip." She inserted the sharp tool into his urethra and cut directly downwards, stopping at the base of his fat dickhead. She turned the scalpel and cut a quarter circle arc through the base of his dickhead, before bringing the scalpel back up to the tip of his cock. She tore at the disconnected quarter of his sensitive dick tip, pulling the remaining connective tissue that kept it secured to the throbbing cock. His cock was now missing the lower left quarter of its head.

The nerves must have been tightly packed in the poor eunuch's cockhead, because he was screaming through the gag, his eyes rolled back in hideous pain. Alice could not imagine what he was going through; the pain surely would have knocked him out if it weren't for the pills she'd forced on him.

She put the tiny chunk of meat into its own little baggy and sealed it carefully. "There we go! Just 3 more of those and we're through the worst of it. Your head is the most sensitive, so it's going to hurt a LOT. Hopefully, the rest of your dick won't feel so bad in comparison!"

She made two more perpendicular cuts through the head, then slid the blade along the underside of the glans, removing the remaining bottom quarter. Two more cuts made quick work of the entire head, and three more baggies were filled.

"Aaaaand, there we go!" She stood up and smiled at her handiwork. His once-proud dick was still relatively...phallic. But his distinctive, beautiful sensitive dickhead was replaced with a bloody gash. The entire member was soaked with blood. Ivan was shaking and

going into shock of some kind, although his moans let her know he was fully conscious. His cock was a good inch shorter.

"Well, about a seventh of the way there!" She took a step back and admired the remaining cock carefully. She frowned at the ragged edges around the stumpy end that her tearing had created; she wanted things a little neater than that. She cut bits off one at a time, trying to smooth out her work. Eventually, she pulled a sharp file out of the toolbox and sanded away the remaining loose bits. Ivan bucked sharply every time she pulled the file across his dick, messing her work up and leaving her with an even more raggedy appendage.

"Stop moving, or I'll take the whole thing!"

This got "his" attention. She smirked up at him. "You did confess, after all. I'm obligated to leave you an inch at the end of this. Full penectomies are only for those who hold out until the bitter end."

"Would you like that? Do you want me to leave you a nub, something the men in jail can play with as they fuck you for being a pedophile?"

He shuddered, but managed to keep mostly still as she filed away a good half inch off, depositing the resulting penile mush into a very messy baggy. The boys over at Evidence Control were going to have a field day with that one.

"There! That looks so much nicer!" His now 5-inch cock stuck out proudly, the tip of it still bleeding slowly, but now perfectly even. Alice was proud of her work. "I like this look a lot more! I think we'll keep this through the rest of it."

"I was going to continue with the dicing, but I'm going to switch to the slicing for this last part!"

"Let's see..Penis diameter of 16 cm, gives us an area of...201 square centimeters, which is about 32 square inches....So to keep our samples under 1 square inch, we need...128 slices!" She gasped. "This is going to hurt SO much more, but the results will be worth it! Our case against you will be locked tight!"

Ivan didn't see how those two statements connected, but before he could consider this carefully, she brought a small folding stand out and set it up between his legs, even with his penis. A papercutter-like attachment fit on top of it on two sliding bars, and Alice slid it flush with the tip of his dick.

"Let's begin."

Alice brought the incredibly thin blade down, slicing off a translucent disk of cockmeat. She bagged it and continued.

The process took hours. Each slice had to be stored meticulously in the plastic bags and labeled properly. By the end, everything was drenched with blood, and Alice collapsed in a sweat. Ivan had only a one inch stub of his cock left, but the drugs she had given him were powerful, and it stood as stiffly as it could, bobbing on the stand painfully.

"There! That should be everything." She flipped through her paperwork, and frowned. Another unfamiliarity she hadn't noticed earlier. A line above her penectomy authorization, specifying that...she had to induce ejaculation before processing?! She rolled her eyes, but the reasoning made sense. Even though his balls were gone, Ivan likely still had some residual semen hiding in the upper parts of his vas deferens. Milking that out would ensure he never passed on genetic material of any kind.

But it was going to be difficult with six-sevenths of his cock gone! Alice sighed, and rolled her eyes. She'd work with what she had to. She pinched the miniature excuse for a penis between her hands, and Ivan moaned piteously. She ungagged him.

"You're a lucky man, Ivan! Well, not...I mean, not a man exactly, but...you know what I mean. You get to leak one last time!"

When he was intact, Ivan was a quick shot. Even after all he'd gone through, the drugs coursing through him kept him alert throughout the pain, and his dick needed to cum like he'd never felt before. He spurted as soon as she touched him, shuddering from the intensity of the pain.

She recoiled quickly, making sure to avoid giving him any undue pleasure. She was just doing her job, not jerking off a rapist. His load went clear after the first few spurts, indicating that his remaining semen was totally flushed out. Ivan cried miserably, his last pleasure as a man completely ruined. He just wanted her to touch his little nub one more time. He thought on the very last time he'd felt that pleasure, that struggling girl behind the restaurant back alley — when his manhood was still intact and throbbing hard, and he was plunging all seven inches into her as she tried to fight him off...

"Melissa!"

Alice froze. She knew the case by heart. None of the victims were named Melissa. She knew rapists thought of their real-life victims the most while they were cumming. That means...

"You didn't confess to everything."

She stared up at him coldly. "You left something out, and tried to keep your dick anyway?!"

"You...you cut off so much, please, I'll...I'm going to jail forever anyway, please let me keep..."

Snip

The stub fell to the ground, and Alice picked it up. It was far larger than the 1 square inch limit she had to keep to; Alice cursed herself for acting in haste.

Well, he was right. This nullified eunuch was going to die in jail. She smiled to herself. Some mishaps, but she felt like she had done her job. The system worked.

Chapter 3 alternate: Unjust

Alice had forgotten to turn the lights off in the questioning room. Ivan came to, bleary-eyed. He felt empty. The loss of his testicles dominated his thoughts. He and his wife, Melissa...they had always wanted children. Ever since they lost their virginity to each other in high school. They'd been careful, but...it was finally time.

Or it would have been. Their careers, their savings...it was all going towards...He looked tearfully at the ground where the remains of his testicles pooled wider.

And he was about to lose his cock. She had been agonizingly cruel on his last two losses...What would she do this time? His eyes went up to meet the terrifying toolbox, full of sharp and scorching and freezing...

Wait.

On the table, there were...some files? Ivan stretched to see something. A victim, an incident report. Something concrete. That's all she needed. He'd go to jail, but his life was ruined anyway. He'd keep his cock.

He'd still be a man.

Alice collected herself. She knew what she had to do. She double checked the form; the "penectomy" was clearly marked. Her last piece of leverage to put away this sick fuck.

She grabbed a couple medicine bottles and entered the room one last time.

Ivan awoke to the feeling of Alice's strong hands on his throat, massaging three pills down him. Before he could struggle, he swallowed all three of them. He instinctively tried to grab his scarred crotch, but the cuffs held strong against his futile attempts.

"Honestly, it's quite impressive, Mr. Miller. Most men have more love for their testicles than this."

"What...what did you just..."

"Oh! I'm getting tired of you passing out after every round, so the first one of those pills is to keep you awake through the entire next part. The blood coagulant should help you avoid bleeding out during the remainder of our session. Wouldn't want the court to

charge me with mistreating a suspect, after all! And of course, it's hard to work on a limp, little flaccid penis, so the last one will keep you rock-hard. Savor it; this will be your last erection ever! Without your balls, your body isn't producing the hormones you need anymore to keep that thing hard." She paused. "And I'll be cutting your dick off, so that'll make getting erections difficult." She laughed at her own joke. Ivan didn't seem to find it as funny.

She reached out and stroked the rock-hard erection. It bobbed wildly at her touch, and he let out a pathetic moan. "You can still feel a little pleasure, right? I mean, I know I destroyed your sex drive," she giggled, "But there's still some residual testosterone floating around inside you. It'll take your body a few days to flush that out. So for now, you're still...kind of a man. I mean, you can't really cum, or produce a sperm sample, but...Well, you're a lot more manly than you're going to be next week."

His bloodshot eyes swivelled to her. She saw, finally, the total defeat in him. He surrendered.

"Maple Street and 16th. The...the Asian one. Last Saturday. It was me."

Alice's eyes lit up. She looked up at the camera to make sure the recording light was on.

"Fucking FINALLY! Now, was that so hard?"

"Just...please don't cut my dick off. You already took my balls. Please, I'll...I'll sign anything you want."

Alice smiled sweetly at him. "I know you will, sweetheart. Now, let me finish my job here." She picked the gag back up and secured it to him, as he screamed in protest. With the correct details of one of his rapes on tape, she had confirmation that he was their suspect. With that out of the way, she didn't have to listen to this asshole anymore. She could focus on the task at hand.

She wiped the larger chunks of testicle matter out of her way between his legs, and sat down cross legged with her toolbox. She dug around until she found the scalpel she was looking for, and a few dozen tiny baggies. She looked up at the despairing rapist, and feigned sympathy. "Sorry big guy, I can't cut the whole thing off at once. Department policy states that I'm not authorized to remove more than..." She flipped to the second page of her clipboard. "One cubic inch at a time. With a cock this big, this will take us quite a while. Sit tight!"

"Let's start with the tip." She inserted the sharp tool into his urethra and cut directly downwards, stopping at the base of his fat dickhead. She turned the scalpel and cut a quarter circle arc through the base of his dickhead, before bringing the scalpel back up to the tip of his cock. She tore at the disconnected quarter of his sensitive dick tip, pulling the remaining connective tissue that kept it secured to the throbbing cock. His cock was now missing the lower left quarter of its head.

The nerves must have been tightly packed in the poor eunuch's cockhead, because he was screaming through the gag, his eyes rolled back in hideous pain. Alice could not imagine what he was going through; the pain surely would have knocked him out if it weren't for the pills she'd forced on him.

She put the tiny chunk of meat into its own little baggy and sealed it carefully. "There we go! Just 3 more of those and we're through the worst of it. Your head is the most sensitive, so it's going to hurt a LOT. Hopefully, the rest of your dick won't feel so bad in comparison!"

She made two more perpendicular cuts through the head, then slid the blade along the underside of the glans, removing the remaining bottom quarter. Two more cuts made quick work of the entire head, and three more baggies were filled.

"Aaaaand, there we go!" She stood up and smiled at her handiwork. His once-proud dick was still relatively...phallic. But his distinctive, beautiful sensitive dickhead was replaced with a bloody gash. The entire member was soaked with blood. Ivan was shaking and going into shock of some kind, although his moans let her know he was fully conscious. His cock was a good inch shorter.

"Well, about a seventh of the way there!" She took a step back and admired the remaining cock carefully. She frowned at the ragged edges around the stumpy end that her tearing had created; she wanted things a little neater than that. She cut bits off one at a time, trying to smooth out her work. Eventually, she pulled a sharp file out of the toolbox and sanded away the remaining loose bits. Ivan bucked sharply every time she pulled the file across his dick, messing her work up and leaving her with an even more raggedy appendage.

"Stop moving, or I'll take the whole thing!"

This got "his" attention. She smirked up at him. "You did confess, after all. I'm obligated to leave you an inch at the end of this. Full penectomies are only for those who hold out until the bitter end."

"Would you like that? Do you want me to leave you a nub, something the men in jail can play with as they fuck you for being a pedophile?"

He shuddered, but managed to keep mostly still as she filed away a good half inch off, depositing the resulting penile mush into a very messy baggy. The boys over at Evidence Control were going to have a field day with that one.

"There! That looks so much nicer!" His now 5-inch cock stuck out proudly, the tip of it still bleeding slowly, but now perfectly even. Alice was proud of her work. "I like this look a lot more! I think we'll keep this through the rest of it."

"I was going to continue with the dicing, but I'm going to switch to the slicing for this last part!"

"Let's see..Penis diameter of 16 cm, gives us an area of...201 square centimeters, which is about 32 square inches....So to keep our samples under 1 square inch, we need...128 slices!" She gasped. "This is going to hurt SO much more, but the results will be worth it! Our case against you will be locked tight!"

Ivan didn't see how those two statements connected, but before he could consider this carefully, she brought a small folding stand out and set it up between his legs, even with his penis. A papercutter-like attachment fit on top of it on two sliding bars, and Alice slid it flush with the tip of his dick.

"Let's begin."

Alice brought the incredibly thin blade down, slicing off a translucent disk of cockmeat. She bagged it and continued.

The process took hours. Each slice had to be stored meticulously in the plastic bags and labeled properly. By the end, everything was drenched with blood, and Alice collapsed in a sweat. Ivan had only a one inch stub of his cock left, but the drugs she had given him were powerful, and it stood as stiffly as it could, bobbing on the stand painfully.

"There! That should be everything." She flipped through her paperwork, and frowned. Another unfamiliarity she hadn't noticed earlier. A line above her penectomy authorization, specifying that...she had to induce ejaculation before processing?! She rolled her eyes, but the reasoning made sense. Even though his balls were gone, Ivan likely still had some residual semen hiding in the upper parts of his vas deferens. Milking that out would ensure he never passed on genetic material of any kind.

But it was going to be difficult with six-sevenths of his cock gone! Alice sighed. She'd work with what she had. She pinched the miniature excuse for a penis between her hands, and Ivan moaned piteously. She ungagged him.

"You're a lucky man, Ivan! Well, not...I mean, not a man exactly, but...you know what I mean. You get to leak one last time!"

When he was intact, Ivan was a quick shot. Even after all he'd gone through, the drugs coursing through him kept him alert throughout the pain, and his dick needed to cum like he'd never felt before. He spurted as soon as she touched him, shuddering from the intensity of the pain.

She recoiled quickly, making sure to avoid giving him any undue pleasure. She was just doing her job, not jerking off a rapist. His load went clear after the first few spurts, indicating that his remaining semen was totally flushed out. Ivan cried miserably, his last pleasure as a man completely ruined. He just wanted her to touch his little nub one more time, he need the feeling he used to have, when his wife dragged him giggling into their bedroom, sucking and fucking him until he was drained. He was missing so much. Would she accept him? Would she want a jailed eunuch with an inch of dick? He cried out at the thought.

"Melissa!"

Alice froze. She knew the case by heart. None of the victims were named Melissa. She knew rapists thought of their real-life victims the most while they were cumming. That means...

"You didn't confess to everything."

She stared up at him coldly. "You left something out, and tried to keep your dick anyway?!"

"You...you cut off so much, please, I'll...I'm going to jail forever anyway, please let me keep..."

Snip

The stub fell to the ground, and Alice picked it up. It was far larger than the 1-inch limit she had to keep to; Alice cursed herself for acting in haste.

Well, he was right. This nullified eunuch was going to die in jail. She smiled to herself. Some mishaps, but she felt like she had done her job. The system worked.

Chapter 3 alternate II: Free

She stepped out of the room and wiped the chunks of his nutmeat off her hands. Maria sauntered up, a wide grin across her face. "So you got the confession, right?"

Alice gave her a look that told her all she needed to know. "STILL not?! You did pop the other one, right?"

"Oh yeah. Made this one hurt, too!" She laughed. "I guess even if he doesn't confess, I've taken a rapist off the streets today."

"This is the Milner case, right? 16 girls, serial rapist, no facial description?"

"Miller, you mean. But yeah."

Maria frowned. "Pretty sure it's Milner. I've been collecting casework on it for weeks."

Alice looked down at the paperwork. Sure enough, if she squinted, she could see how the second L could be interpreted as an N. "Christ, Maria, your handwriting is terrible!" She flipped back to the picture of the suspect's license, and the name Ivan Miller was clear as day.

"Oh fuck." She gasped.

"You got the wrong guy?!" Maria looked over her shoulder. "Oh my god, you got the wrong guy entirely!" She started cracking up. "You just neutered some innocent citizen! Holy shit that's hilarious!"

Alice spun around. "FUCK me. They're going to file police brutality suits, and..."

Maria put a hand on her shoulder. "Relax. It's going to be fine. This kind of thing happens almost every other week. Our officers tend to be pretty eager when it comes to interviewing suspects, and... Well, like they say: you can't substantially lower the citywide crime rate without breaking a few eggs." She smiled warmly.

"There's a couple forms you'll need to fill out to clear yourself, and we're going to have to release him immediately. But you'll be fine, career wise. The judges are always on our side. Oh, and bring him this." She opened a filing cabinet and pulled out a sheaf of pamphlets. "Some literature to help him through his new life. Urologist recommendation, adoption agencies, divorce attorney contact info if he has a wife..."

"Divorce attorney?"

"Yeah, something like 90% of women leave their husband post-castration or penectomy. Is it really that surprising they want a man with a working cock?"

"Guess not. Thank God! I thought I was the first one to screw up this bad."

"Nah, we protect our own here. Last week, Samantha mistook her cheating ex-boyfriend for a suspect. You know, the one that cheated on her with a prostitute? Popped both nuts AND cut his dick in half lengthwise before she reread the case carefully." Maria giggled.

"No idea how she screwed up a 5'6" white male with a 6'2" latino. Honestly, with how many nuts you go through, it's impressive that this is your first one."

Alice grabbed the folder and walked back into the questioning room. Things were going to turn out fine.

"Mr. Miller?"

The eunuch groggily came to, then doubled over in agony. His cuffs had been released, and the remnants of his testicles and scrotum had been severed neatly, if not painlessly. Several large medical staples held the wound together.

"The city would like to thank you for your help in our investigation. You're free to go." She handed him the sheaf of pamphlets. "Denise, at the front desk, has your personal belongings. You've been cleared of all wrongdoing." She smiled down at him. "Your questioning is over! I don't even have to remove your penis. Good news, right? You may need to see a doctor ASAP though. Those staples aren't meant for long-term use."

He pulled his pants up wearily, wincing and tearing up as they brushed against his new castration scar. "What...what just..."

"Simple mixup, that's all. Oh! Don't forget to leave your payment info with Denise."

"Payment..."

"For the speeding ticket, of course! You don't get out of that just because you lost your balls." She smiled. "City needs that income!"

"And I know you mentioned you were trying for kids. There's some adoption agency info in there for you. I'm sure you and your wife can qualify. Good luck!"

Until next time

You made it to the end. Hopefully your gonads are more functional than the ones you just read about.

I love hearing from readers. Whether you've got feedback, a request, an oddly specific scenario you've been dying to see written, a unformatted wall of text meticulously describing each and every ballbusting fantasy you've ever masturbated to, or just want to correct all of my typos, drop me a line.
